

How to Give Injections

GLUCAGON:

1. Remove cap from vial of glucagon powder and from syringe of sterile liquid
2. Insert syringe into the vial and push the plunger to empty liquid from syringe into vial
3. Holding the syringe and vial together, gently shake the vial to mix powder and liquid
4. Pull plunger to fill syringe with new liquid glucagon mixture
5. Insert needle into a **muscle** and push plunger to inject all of the liquid
6. Call 911!
